**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claims 1, 6, and 7, from which the remaining claims depend, limit the tamper-evident ring segments connected to the collar by "unbreakable and flexible connecting bodies." It is not clear how a flexible portion of injection molded plastic can also be "unbreakable."

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gregory et al. US 6,053,344 in view of Grussen US 4,394,918.

Gregory '344 teaches a neck (26), and plastic collar (34) having a top side (30), screw thread (28, 36), blocking rib (44), taper-evident ring comprising segments (24b), as shown in figure 12, with inwardly projecting flexible blocking members (58), and which are connected by breakable bridges (52b), and which has a larger diameter (about its lowest point) than the plastic collar (34).

The reference, as applied, teaches all limitations substantially as claimed but fails to teach the ring segments being connected by flexible connecting bodies, and which create openings inbetween which are viewable in plan.

Art Unit: 3781

Grussen '918 teaches a threaded tamper-evident closure, whereby a tamper-evident ring (2) is connected to a collar by flexible connecting bodies (4), which create openings therebetween which can be seen in plan, which allows sealing of a container having an outwardly tapering neck (10).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the closure cap of Gregory '344, forming the tamper-evident ring with flexible connections which create openings which can be viewed in plan, as taught by Grussen '918, motivated by the benefit of allowing the closure to be applied to a container with a tapered neck.

Regarding claim 2, the lip (44) of Gregory '344 has an upper surface which projects upwardly and inwardly, as seen in figure 2.

Regarding claim 3, the breakable bridges extend nearly to the bottom of the ring, as shown in figure 14, and thus are in the vicinity the underside of the ring segments.

#### ***Response to Arguments***

5. Applicant's arguments with respect to claims 1-5 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
